METAL-TO-METAL LUBRICANT

METALGLIDE-100

MetalGlide-100 is a high performance metal-to-metal lubricant for extended-reach coiled tubing operations. This product reduces torque and drag, as well as decreases friction and wear under high torque and pressure wellbore environments.

APPLICATION

MetalGlide-100 is extremely effective at reducing coefficient of friction, making it ideal for milling operations.

MetalGlide-100 is typically run continuously at 1.0 L/m³ or added at a loading of 5 – 20 L/m³ for batch treatments, depending on application.

PROPERTIES

Appearance	Liquid, Dark Brown
Odour	Hydrocarbon
pH (1%)	Not Available
Freeze	< -40°C
Flash	> 94°C
Density	0.880

HANDLING & STORAGE

Handle wearing appropriate PPE. Ensure adequate ventilation. Store out of direct sunlight. Refer to SDS for more information.

PERFORMANCE
