CLAY STABILIZER

TERRAGUARD- 101C

TERRAGUARD-101C is a concentrated and high-performance product designed as a substitute and replacement for traditional KCl or choline chloride. TERRAGUARD-101C offers permanent inhibition of clay swelling as well as control over fines migration.

APPLICATION

TERRAGUARD-101C is typically used between 0.35 and 1 L/m³, depending on severity of clay swelling risk.

PROPERTIES

Appearance	Pale Liquid
pH (1%)	6-8
Freeze	< -20°C
Density	1.14

HANDLING & STORAGE

Handle wearing appropriate PPE. Ensure adequate ventilation. Store out of direct sunlight. Refer to SDS for more information.

PERFORMANCE
